**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trushkowsky (6186786). Trushkowsky shows a handle 10, utility element 12, light receiving top surface as shown, downwardly converging cone shaped body 23, Fig. 5, and an integral work piece 24 having a downwardly directed curved portion as shown. The work piece defines an axis at an angle with respect to the handle axis as shown in Fig. 7. The specific angle used is an obvious matter of choice in the degree of a known parameter to one of ordinary skill in the art looking to gain access to hard to reach places within the mouth. To use the shown structure with a matrix is an obvious matter of choice in the intended use of a known structure to the skilled artisan. As to claim 13, Trushkowsky shows a hyperbolic surface at 25.

Claims 5-7 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trushkowsky (6186786) in view of Maitland (4696646). Trushkowsky shows a handle 10, utility element 12, light receiving top surface as shown, downwardly converging cone shaped body 23, Fig. 5, and an integral work piece 24 having a downwardly directed curved portion as shown. The work piece defines an axis at an

angle with respect to the handle axis as shown in Fig. 7. The specific angle used is an obvious matter of choice in the degree of a known parameter to one of ordinary skill in the art looking to gain access to hard to reach places within the mouth. Trushkowsky does not show a flat surface. Maitland shows a flat surface at 1. It would be obvious to one of ordinary skill in the art to modify Trushkowsky to include the shape shown by Maitland in order to better distribute light in use.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-4, 6-8 and 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 2, 3, 6, 8, 10 and 11, "the axis of symmetry" lacks proper antecedent basis within the claims.

### ***Allowable Subject Matter***

Claims 4, 8 and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

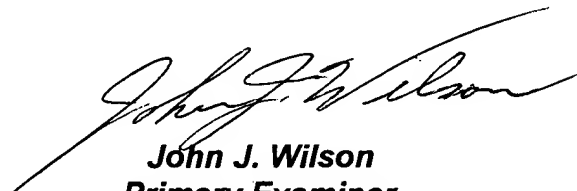

***Drawings***

The drawing filed August 9, 2001 have been found to be acceptable by the examiner.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nosov (6208788) shows shapes.
